High-speed Internet, now available beyond the back forty.

The sun is officially setting on dial-up Internet.

How, you say?

We live too far out of town to get high-speed, you think.

Well, WildBlue is changing all that.

Our satellites take high-speed Internet off the beaten path ...

And put it exactly where you want it.

Your home. Your office. Your land.

(Your front porch with the dog, if that works out.)

So you can finally have the best of the Internet.

No more busy signals or waiting for pages to load.

It's a whole new day in country connectivity.

Why wait?
