

Environmental Umpire Making Bad Calls

MESSAGE FROM MANAGER ALAN LESLEY

As a big Texas Rangers baseball fan, sometimes I'm upset by an umpire's decision. I know umps are needed to enforce rules of the game, but I've seen quite a few blown calls in my time.

In many ways, umpire mistakes mirror what's going on with government regulation regarding electric utilities and electricity production. The U.S. Environmental Protection Agency writes the rulebook for power suppliers, and EPA also serves as an umpire, enforcing the rules of the game.

At CECA, we're committed to keeping your electric bill affordable. So you can understand why I get upset when I see EPA folks make bad calls that put pressure on how much you pay for power.

Over the past two years, Congress debated, but never passed, a comprehensive climate-change bill. Into this void, EPA has stepped forward and has now fielded a team of new regulations. Out of these "players," three could hit electric bills out of the park.

Cross State Air Pollution Rule: This rule is aimed at capping power plant emissions of sulfur dioxide and nitrogen oxides from state to state between Texas and the District of Columbia. EPA claims the rule, when combined with other state and federal measures (such as Maximum Achievable Control Technology rules for mercury emission), will reduce sulfur dioxide emissions from power plants by 71 percent and nitrogen oxides emissions by 52 percent from 2005 levels, but it will cost utilities \$2.8 billion every year to comply.

Currently, these regulation have been stayed by a federal court until April 2012, when they will be ruled on again. While this is a minor victory for utilities, the CSAPR is still a major concern.

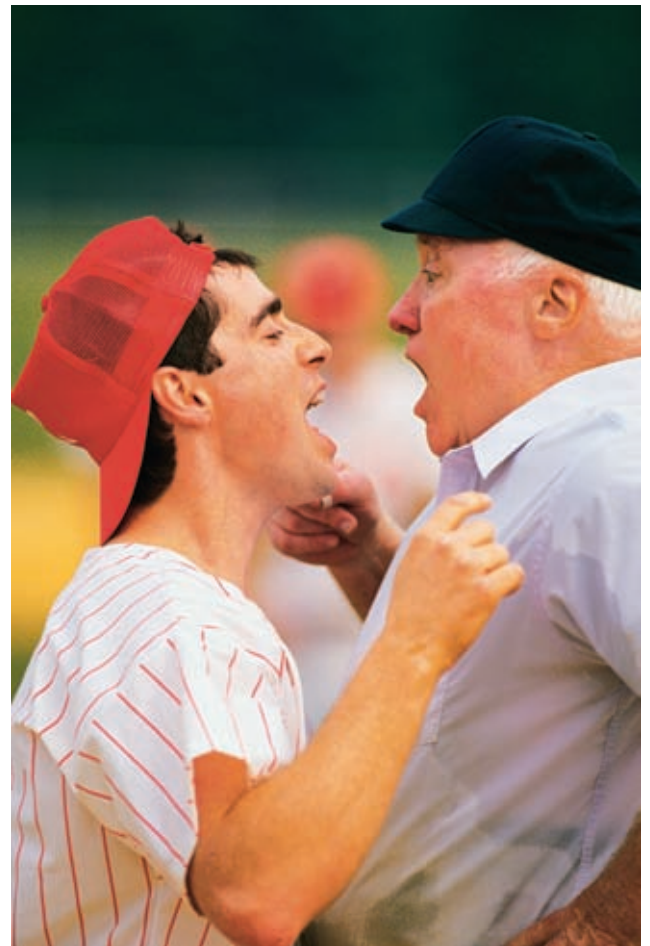

Cooling Water Intake Requirements: Power plants use water from lakes or rivers to cool generating equipment. While screens and various components prevent fish and other wildlife from entering water intake pipes, EPA thinks this equipment could be improved. We are expecting a rule proposal, and the impact could be severe. The North American Electric Reliability Corporation, the nation's bulk power grid watchdog, claims if this rule is strictly enforced, one-third of U.S. electricity capacity may need to be retired.

Coal Ash: To ensure the safe disposal of fly ash and other residues (bottom ash, scrubber sludge and slag) produced by coal-fired power plants (known as coal combustion residual, or CCRs), EPA is considering whether to designate the materials—for the first time—as hazardous waste. Complying with this rule could cost billions and would also halt recycling efforts.

Right now, we use one-third of all fly ash as a Portland cement substitute—and for every ton of concrete replaced by fly ash, a ton of greenhouse gas emissions is avoided. On four prior occasions, most recently under the Clinton administra-

tion in 2000, EPA determined CCRs do not warrant regulation as a hazardous waste. Not only did EPA find CCRs rarely, if ever, exhibit a hazardous waste characteristic, the agency also concluded that states can safely manage CCRs under federal non-hazardous waste rules.

CECA is committed to keeping you informed about government regulations that will increase the cost of electricity. We're joining co-ops nationally to ask Congress for a much-needed time-out—a two-year moratorium on EPA regulation of carbon

dioxide greenhouse gases. A delay would give lawmakers the opportunity to fashion realistic climate-change legislation that protects you, our members, and keeps electric bills affordable.

Conservation MATTERS

THE LATEST NEWS AND INFORMATION ABOUT ENERGY CONSERVATION FROM YOUR ELECTRIC COOPERATIVE

ecoPOWR Rebate Program

Through an Energy Efficiency Rebate Program awarded to CECA through our power supplier, Brazos Electric Cooperative, we are able to offer rebates to our members on approved energy-efficiency measures. This is a program we are extremely happy to offer our members. It has been designed to encourage cooperative members to select cost-effective energy-efficiency measures that will reduce power costs in their homes and businesses. The program will offer rebates when members invest in any of the following rebate opportunities:

HOME ENERGY EVALUATION: This program will offer rebates when members install more efficient lighting, electric heating and cooling equipment, attic insulation, low-flow showerheads, low-flow faucet aerators, water heater blankets for electric water heaters, hot water pipe insulation and commercial lighting upgrades.

COMPACT FLUORESCENT LIGHTING: Replace existing incandescent bulbs with compact fluorescent lighting.

Qualified Rebate: \$1.25 per bulb

LOW-FLOW SHOWERHEADS: Replace existing showerhead with a new one having a flow rate of less than two gallons per minute.

Qualified Rebate: \$10 per showerhead (electric water heating only)

LOW-FLOW FAUCET AERATORS:

Replace an existing faucet with a unit that has a low-flow rate of 1.5 gallons per minute in bathrooms and less than 2.2 gallons per minute in kitchens.

Qualified Rebate: \$5 per faucet (electric water heating only)

WATER HEATER BLANKET: Install an insulating blanket on your existing electric water heater.

Qualified Rebate: \$15 per electric water heater

PIPE WRAP: Insulate all exposed hot water pipes to reduce heat loss.

Qualified Rebate: \$10 per electric water heater

**eco
POWR**
Powering Our World
Responsibly

HEATING AND AIR CONDITIONING TUNEUP: An annual tuneup includes checking and correcting the unit's refrigerant charge, repairing leaks if required, cleaning and lubricating the blower unit, inspecting and cleaning

of refrigerant coils, replacing filters, thermostat inspection, wiring inspection and duct work inspection.

Qualified Rebate: Up to \$100 per unit (one inspection per 12 months)

CEILING INSULATION UPGRADE: This rebate is available to members living in conventional single-family homes using electric air conditioning and resistance electric heat. Homes with R-8 insulation or less must increase insulation to a minimum of R-38 to qualify for the rebate. A receipt from the contractor performing the upgrade must document existing insulation R-value prior to upgrade and the resulting R-value after the upgrade.

Qualified Rebate: \$275 per residence

HIGH-EFFICIENCY ELECTRIC HEAT PUMP: Members are encouraged to purchase equipment with better performance to reduce electricity demand and energy consumption. Members requesting a rebate must provide a purchase receipt from a licensed HVAC contractor showing the make and model number of the equipment installed. The equipment efficiency will be certified by the Air-Conditioning Heating and Refrigeration Institute, and a copy of the certification must accompany the sales receipt. This rebate is available to members who replace existing HVAC equipment, as well as new home construction.

Qualified Rebate for 14 SEER Heat Pump: \$100

Qualified Rebate for 15+ SEER Heat Pump: \$200

ENERGY STAR ROOM AIR CONDITIONERS: Replace your existing room

air conditioner with an Energy Star unit with an Energy Efficiency Ratio (EER) of at least 9.8.

Qualified Rebate: \$30 per unit

HIGH-EFFICIENCY ELECTRIC WATER

HEATER: Replace your existing stand-alone hot water heater with a high-efficiency electric water heater with an energy factor (EF) of .94.

Qualified Rebate: \$25 per electric hot water heater

ENERGY STAR DISHWASHER: Energy Star dishwashers save energy by using both improved technology for the primary wash cycle and less hot water to clean. Replace your existing dishwasher with an Energy Star model with an EF of .65 or higher.

Qualified Rebate: \$15 per unit (electric water heating only)

COMMERCIAL LIGHTING FIXTURE

UPGRADES: A variety of high-efficiency fixtures, ballasts and lamps exist in the market today producing the same output of lumens while consuming fewer watts of electricity. Replacing existing lighting with new high-efficiency lighting will result in a reduction in the number of watts of electricity needed to operate the lighting. Contact the CECA Member Service Department for verification before upgrading.

Qualified Rebate: 20 cents per watt saved per fixture

COMPACT FLUORESCENT LIGHTING

PROGRAM: Residential members who sign up for a free energy evaluation performed at their primary residence will be eligible to receive four compact fluorescent lightbulbs for their most frequently used fixtures.

For questions on any of these programs, please call CECA's Member Service Department at 1-800-915-2533, or email memberservices@ceca.coop.

CECA is continually seeking additional ways to save you money. In addition to these suggestions, we encourage you to watch these local pages, check our website and Facebook page for energy-efficiency tips, and contact us if you have questions or if we can be of any assistance.

Scholarship Deadline March 16

Six \$1,000 scholarships to be awarded.

Visit www.ceca.coop for more details, or call Shirley Dukes at 1-800-915-2533 or email sdukes@ceca.coop.

January 6, 2012

Dearest CECA Membership,

I wanted to send a quick note to update you about my academic progress. I finished the first semester at Baylor and simply love it! The courses were so interesting and the professors were not only knowledgeable, but they brought the information to life! I particularly loved my Hebrew class!

I am living in the leadership dorm and they have kept me quite busy! We do service projects around Waco and on the Baylor campus. We spent a weekend off campus at a retreat and some of the activities we participated in were similar to the ones I participated in at the Ben Sheppard leadership training!

I am also involved in the Honors College and the Baylor Business Fellows. I am anxious for a new semester. I haven't decided on a major yet but I am considering Museum Studies, and Baylor has one of the only three programs in the country. I have a Museum Studies class on my spring schedule so I am anxious to learn about it!

I came to Baylor at an exciting time. We brought a Heisman Trophy to Baylor for the first time, and our girls and boys basketball teams are off to Number 1 rankings! The campus is full of excitement and school spirit! It is a fun time to be a Baylor Bear!

I especially wanted to thank you again for your investment in my education. Without scholarships, it would be impossible for me to attend Baylor. I am so blessed to be at Baylor and I hope you all know that Comanche Electric is a big part of that blessing.

*Sincerely,
Susan Coffee*

CECA Offers Healthy Savings

Co-op Connections saves members even more money with three new benefits

In 2008, CECA introduced the Touchstone Energy Co-op Connections Program to help our members save money when they dine out, make purchases or stay in hotels. It also offers a prescription drug benefit that, to date, has saved CECA members over \$60,000, an average of 38 percent savings on prescription drugs.

Now, CECA's Co-op Connections Program is about to save members even more!

Prescription and Healthy Savings Discount

The CECA Touchstone Energy Co-op Connections card now offers members significant savings on lab and imaging services, and chiropractic, dental, vision and hearing care. The new Healthy Savings package is available at no cost to CECA members who print a paper card from www.healthy.savings.coop and show it at participating providers along with their plastic Co-op Connections card. This brand-new benefit is part of a commitment to helping CECA members save money during these challenging economic times.

This discount program is NOT insurance and cannot be used in conjunction with insurance; however, for CECA members who may not have insurance that covers prescriptions or certain health services, this could offer significant savings.

"The Healthy Savings package will help our members stretch their paychecks just a little further and reinforces CECA's commitment to service beyond the meter," said CECA Director of Member Services Doug Erwin. "The Co-op Connections card is one way that CECA works to improve the quality of life in the communities we serve."

Many insurance plans do not include provisions for dental, hearing and vision care, which means many people do not receive these much-needed services. With the new

Healthy Savings package, CECA members get no-cost access to six discounted health benefit areas: prescription, vision, dental, hearing, lab imaging and chiropractic care.

Savings include:

Prescription: 10 to 85 percent discount on prescription drugs at over 60,000 national and regional pharmacies

Dental: 20 to 40 percent discounts on a range of dental care services

Vision: 20 to 60 percent off eyewear

Hearing: 35 percent discount off hearing-aid prices at 2,000-plus Newport Audiology Center locations

Lab and Imaging Work: 10 to 60 percent off usual charges for MRI, CT and other lab procedures

Chiropractic: 30 to 50 percent off diagnostic services and treatments

Detailed information on available savings and how to take advantage of the entire Healthy Savings package is posted at www.healthysavings.coop. You can also find local participating providers here by clicking the "Locate Providers" link. Click the "Print My Card" link to print a paper version of the card to show with your plastic card at providers for services. If you do not have access to the Internet, or if you do not have a plastic card, please call CECA at 1-800-915-2533, and someone will assist you.

CECA is part of the Touchstone Energy Cooperatives brand, a nationwide alliance of more than 725 consumer-owned electric cooperatives dedicated to serving their members and communities with integrity.

To locate providers that participate in the Healthy Savings program, have your card handy and call 1-800-800-7616, or visit www.healthysavings.coop. Examples of savings through the Healthy Savings program accountability, innovation and commitment to community.

There's an App for That!

The Co-op Connections card is now offers a free app for iPhone, iPad, iPod Touch, Droid and Blackberry. Now you can have a virtual card (front and back) with vital prescription discount information on your phone, use your phone's GPS feature to find businesses that accept the card if any are nearby, and identify your favorite discount deals and save them in "My Deals" for easy access.

To download the app, open iTunes on your smartphone or tablet. Locate the app by searching Co-op Connections, then follow the easy download instructions.

Trimming Trees for Reliability

Trees coming in contact with power lines can cause momentary or extended power outages. In extreme cases, trees can even knock down power lines, causing longer power outages.

CECA has a tree-trimming program in place to help prevent this from happening. By trimming trees that are near or touching power lines and trying to maintain a minimum clearance of 10 feet on all sides of a power line, outages can be reduced within our service territory.

This tree trimming takes place year-round throughout the service territory. But with an estimated regrowth of five to eight years, this is a temporary fix at best.

CECA has a large annual budget for tree growth control that includes trimming as well as removal of trees. Substations with the most outage hours receive top priority, with crews starting at the substation and trimming to

the end of that substation's line. When possible, trees are removed instead of just trimmed in an effort to alleviate the problem, as well as additional expense, for a longer period of time.

If you have a plan in place for removal of trees within 10 feet of

CECA electric lines, you might qualify for some reimbursement. You must obtain details of the program before commencing work. For details, call Director of Member Services Doug Erwin at 1-800-915-2533 or email him at derwin@ceca.coop.

MY VIP SAVINGS

MyVIPsavings.com is an amazing Internet mall where you can enjoy convenient shopping and exciting savings at over 1,000 of your favorite online stores. Plus, you will receive CashBack dollars on every qualifying purchase! This site offers thousands of great deals throughout the year at hundreds of online stores.

Most of the products and services offered by the many quality merchants on MyVIPsavings.com generate bonuses at the time of sale. When you make a qualifying CashBack purchase, your account will be credited with CashBack dollars once your transaction has cleared.

The CashBack dollar amount is determined by the individual merchant. CashBack dollars are paid as either a flat-rate dollar or a percentage of the qualifying purchase price. CashBack dollar amounts may vary

depending on the purchase amount or item purchased and, in some cases, certain items and special discounts may not qualify for CashBack dollars. Once your transaction has been processed, you will be able to view the exact CashBack dollar amount generated under "My Account" on MyVIPsavings.com.

CashBack dollars for qualifying transactions are paid out upon request provided they have fully cleared and are equal to at least \$25. Once the CashBack dollars totaling at least \$25 have cleared, you can request a CashBack payment by choosing "Request a Payment" under the "My Account" section of MyVIPsavings.com.

Look for deals of the day on your homepage and specials like double cash back. All of these deals are made possible by CECA and other rural electric cooperatives.

Help Us Locate These Accounts

Capital credit checks were issued to these members in July 2011, but were returned due to insufficient addresses. They represent a portion of \$350,000 refunded for service in 1982 and part of 1983.
